2

CLEAR BOTH

Selector for the first and second selection set. Users can choose sets from the selection history list by id. The button on the right clears both selections.

68%

32%

Selected (black) and unselected (gray) fractions of the dataset.

Fraction of selected instances only in the magenta selection set.

Overlap between both sets

Fraction of selected instances only in the cyan selection set.

RESET HISTORY

Past selections

Id	Size	Description
2	300	Instances with feature 'Drama'
1	147	Instances with feature 'Action'
0	3756	Original dataset

Selection history contains all previous selections, their size and a textual description of what was selected. Past selections can be assigned to current selection based on their id.
